

ARGENTINA
LAW NO. 20247/73
ON SEED
AND PHYTOGENETIC CREATIONS*
Of March 30, 1973

CHAPTER 1

GENERAL

Article 1

The purpose of this Law is to promote efficient activities in the production and marketing of seed, to provide agricultural producers with the guarantee of the identity and quality of the seed they acquire and to protect property in phyto-genetic creations.

Article 2

For the purpose of this Law:

“seed” shall mean any plant organ intended for sowing or propagation.

“phyto-genetic creation” shall mean any cultivar obtained by discovery or by the application of scientific knowledge to the inheritable improvement of plants.

Article 3

The Ministry of Agriculture and Animal Husbandry, with the advice of the National Seed Commission, shall implement this Law and establish the requirements, standards and tolerance levels, both is general and for each class, category and species of seed.

CHAPTER II

NATIONAL SEED COMMISSION

Article 4

There shall be set up, within the jurisdiction of the Ministry of Agriculture and Animal Husbandry, a National Seed Commission having the nature of a collegiate body, with the functions and powers assigned to it by this Law and by the relevant regulations.

Article 5

The Commission shall consist of ten (10) members appointed by the Ministry of Agriculture and Animal Husbandry. The members shall be required to have special knowledge of seed. Five (5) of the members shall be officials representing the State, of which two (2) shall belong to the National Directorate of Agricultural Control and Marketing, two (2) to the National Institute of Farming Technology and one (1) to the National Grain Board. Five (5) further members shall represent the private sector, one (1) of which shall represent the plant

breeders, two (2) shall represent the production and marketing of seed and two (2) shall represent the users. The ministry of Agriculture and Animal Husbandry shall determine which of the representatives of the State shall act as President and Vice-President of the Commission. The remaining persons comprising the Commission shall act as members of the Commission.

Each member of the Commission shall have an alternate appointed by the Ministry of Agriculture and Animal Husbandry, who shall act in the absence of the full member, having the same capacity as the member.

The representatives of the private sector, whether full members or alternates, shall be appointed on the proposal of the most representative entities of each branch. Their term of office shall be of two (2) years. They may be reelected and may not be removed during their term of office, except on serious grounds. They shall receive an indemnity to be laid down each year on the proposal of the Ministry of Agriculture and Animal Husbandry.

Article 6

The Commission shall take its decisions on a simple majority of the votes and the President shall have a casting vote in the event of equally divided voting. Such decisions shall be communicated to the Ministry of Agriculture and Animal Husbandry which, should it judge them to be pertinent, shall have them implemented by its specialized services.

Article 7

The Commission shall have the following duties and powers:

To propose rules and interpretation criteria for implementing this Law.

To specify the species to be included under the “supervised” seed system.

To pronounce on any matter submitted to it by the technical services of the Ministry of Agriculture and Animal Husbandry in compliance with this Law and its regulations.

To consider and give opinions on draft official policies, laws, decrees, decisions and provisions of a national, provincial or municipal nature related to the subject matter of this Law as well as to the official agricultural produce marketing bodies.

To examine the evidence regarding presumed infringements of this Law and propose, as appropriate, applications of the penalties laid down in Chapter VII.

To settle technical disputes arising between the services of the Ministry of Agriculture and Animal Husbandry and identifiers, merchants, distributors and users arising from the applications of this Law and its regulations.

To propose to the Ministry of Agriculture and Animal Husbandry the fees to be levied for the services provided under this Law and also any amendment to those fees.

In addition to the duties and powers set out above, the Commission may propose such governmental measures as it holds necessary for improved compliance with the Law.

Article 8

The Commission shall lay down its own internal working rules and shall have a standing Technical Secretariat.

It shall set up committees to deal with specific matters, which may be of a standing nature and which shall be composed in accordance with the above-mentioned rules.

CHAPTER III

SEED

Article 9

Seed displayed to the public or supplied to users for any purpose must be duly identified and the following minimum particulars shall be specified on the container label:

Name and address of the identifier of the seed and his registration number.

Name and address of the merchant selling the seed and his registration number, where he is not the identifier.

Common name of the species and the botanical name for those species where it is required by regulation; in the event of a mixture of two (2) or more species, the term “mixture” together with the names and percentages of each of the components that individually or jointly exceed the total percentage established by regulation.

Name of the cultivar and its varietal purity, where appropriate; where such is not the case, the term “common” shall be given.

Percentage of physical—botanical purity, by weight, where it is less than the values laid down by regulation.

Germination percentage, as a figure, and the date of the analysis (month and year) where it is lower than the values laid down by regulation.

Percentage of weeds for those species where such is required by regulation.

Net content.

Harvest year

Origin, in the case of imported seed.

“Category” of the seed where appropriate.

“Treated seed—poison” in red letters where the seed has been treated with a toxic substance.

Article 10

The following “classes” of seed are established:

“Identified.” Seed that complies with the requirements of Article 9.

“Supervised.” Seed that not only complies with the requirements for “identified” seed and obtains good results in officially approved tests, but is also subjected to official control during the stages of its production cycle. This class shall comprise the “categories”: “original” (basic or fundamental) and “certified” in various grades.

The regulations may establish other categories within the above-mentioned classes.

The Ministry of Agriculture and Animal Husbandry, with the advice of the National Seed Commission, shall maintain within the revised production system all those species that are subject thereto on the date of entry into force of this Law and may compulsorily incorporate into the “supervised” seed system such species as it deems fit for agronomic reasons or reasons of the general interest.

Article 11

The importing and exporting of seed shall be subject to the arrangements under this Law in accordance with the rules laid down by the National Executives Power in order to protect and promote agriculture production within the country.

Article 12

When setting disputes as to the quality of seed that is imported or exported, the international standards applicable to methods and processes for analysis and seed tolerances shall be applied.

Article 13

There shall be set up, under the jurisdiction of the Ministry of Agriculture and Animal Husbandry, a National Register of Seed Trade and Supervision in which shall be entered, in accordance with the provisions to be laid down by regulation, all persons who import, export, produce supervised seed, process, analyze, identify or sell seed.

Article 14

Any type of transfer of seed for the purposes of trade, sowing or propagation by third parties may only be effected by a person entered in the National Register of Seed Trade and Supervision and who shall be responsible, on transfer of the seed, for its correct labeling. The regulations shall lay soon those cases where such responsibility may cease due to the passage of time or other factors.

Article 15

The Ministry of Agriculture and Animal Husbandry, with the advice of the National Seed Commission, may prohibit or subject to special requirements and rules, either provisionally or permanently, over all or part of the national territory, the production, promotion or marketing of given seed where it deems fit for agronomic reasons or for reasons of the general interest.

When taking any of the above-mentioned measures, the Ministry of Agriculture and Animal Husbandry shall be required to lay down a sufficient period of time for their application to avoid damaging legitimate interests.

CHAPTER IV

NATIONAL REGISTER OF CULTIVARS

Article 16

There shall be set up, under the jurisdiction of the Ministry of Agriculture and Animal Husbandry, a National register of Cultivars in which shall be entered any cultivar identified for the first time in accordance with Article 9 of this Law; the entry must be sponsored by an agricultural engineer having a national title or a qualification recognized as equivalent. Cultivars of public knowledge on the date of entry into force of this Law shall be entered *ex officio* by the above-mentioned Ministry.

Article 17

The application for entry of a cultivar shall state the name and address of the applicant, the botanical species, the name of the cultivar, the origin, the most distinctive characteristics in the view of the professional sponsor, and the source. The Ministry of Agriculture and Animal Husbandry, with the advice of the National Seed Commission, may establish additional requirements for the entry of certain species. Cultivars of the same species may not be entered with the same or a confusingly similar name; the denomination in the original language shall be respected, following the same criterion. Entry in the Register established by Article 16 shall not afford property rights.

Article 18

Where the Ministry of Agriculture and Animal Husbandry, with the advice of the National Seed Commission, considers it proven that the name is the same or confusingly similar, it shall give priority to the name given in the first description of the cultivar in a scientific publication or in an official or private catalogue, or to the common name or, in case of doubt, to the first name entered in the National Register of Cultivars, the use of other denomination shall be prohibited as from a date to be laid down in each case.

CHAPTER V

NATIONAL REGISTER OF CULTIVARS OWNERSHIP

Article 19

There shall be set up, under the jurisdiction of the Ministry of Agriculture and Animal Husbandry, a National register of Cultivar Ownership for the purpose of protecting the property rights of the creators and discoverers of new cultivars.

Article 20

The phytogenetic creations and cultivars that are distinguishable from the creations and cultivars already known on the filing date of the application for property rights and of which the individuals possess sufficiently homogenous and stable hereditary characteristics through successive generations may be entered in the Register set up by Article 19 and shall be considered “property” as provided by this Law. The appropriate action must be taken by the creator or discoverer, with the sponsorship of an agricultural engineer having a national title or a qualification recognized as equivalent, and the new cultivar must be identified with a name that complies with the relevant provision of Article 17.

Article 21

The application for property rights in the new cultivar shall set out the characteristics required by Article 20 and shall be accompanied by seed and samples of the cultivar if so required by the Ministry of Agriculture and Animal Husbandry. The ministry may subject the new cultivar to laboratory and field tests and trials in order to confirm the claimed characteristics and may accept as evidence the reports on trials previously carried out by the applicant for property rights and reports by official services.

On the basis of such elements of judgement and with the advice of the National Seed Commission, the Ministry of Agriculture and Animal Husbandry shall decide whether to grant the corresponding title of ownership. Until such title is granted, the cultivar concerned may not be sold or offered for sale. The owner shall be required to keep a living sample of the cultivar at the disposal of the Ministry of Agriculture and Animal Husbandry during the term of validity of the title concerned.

Article 22

The title of ownership of a cultivar shall be granted for a term of not less than ten (10) nor more than twenty (20) years, depending on the species or group of species, in accordance with the provisions of the regulations. The title of ownership shall contain the date of issue and the date of expiry.

Article 23

The title of ownership of a cultivar may be assigned on condition that the corresponding transfer shall not be enforceable against third parties.

Article 24

The property right in a cultivar shall belong to the person who has obtained the cultivar. The persons involved in the work relating to the phylogenetic creation or the discovery of a new cultivar shall have no rights in the exploitation of the cultivar on their own behalf, unless they have the authorization of the owner.

Article 25

Ownership of a cultivar shall not prevent other persons who have obtained the cultivar, which may be entered in the name of its creator without the consent of the owner of the phylogenetic creation used to obtain it, provided that the original cultivar does not have to be used in a permanent manner to produce the new cultivar.

Article 26

A title of ownership sought for a foreign cultivar must be filed by its creator or by his duly authorized representative residing in Argentina and shall be granted on condition that the country in which it originates affords similar rights to Argentine phylogenetic creations. The maximum term of ownership in such cases shall that remaining up to expiry of the rights in the country of origin.

Article 27

The property rights in a cultivar shall not be infringed by anyone who, for any reason, furnishes seed of the cultivar with the owner's permission or who holds back and sows seed for his own use or who uses or sells as raw material or foodstuff the product obtained by growing and phylogenetic creation.

Article 28

The title of ownership of a cultivar maybe declared to be "restricted public use" by the National Executive power, on a proposal by the Ministry of Agriculture and Animal Husbandry, on the basis of equitable compensation for the owner where such declaration proves necessary to ensure adequate supplies in the country of the product obtained from growing the cultivar and where the person enjoying the property rights does not satisfy the public need for seed of such cultivar in the quantity and at the price considered reasonable. During the period during which a cultivar is declared to be of "restricted public use," the Ministry of Agriculture and animal Husbandry may allow it to be used by interested persons who are able to provide satisfactory technical guarantees and who duly register with the Ministry. The declaration by the Executive Power may or may not state the compensation to be paid to the owner or such compensation may be determined between the parties concerned. Where the parties fail to agree, the National Seed Commission shall lay down the compensation by a decision that shall be appealable before the Federal Court. The negotiation of the agreement on compensation may under no circumstances delay the

availability of the cultivar, which shall be immediately available following the declaration by the National Executive Power; failure to comply shall make the owner punishable in accordance with this Law.

Article 29

The declaration of “restricted public use” in respect of a cultivar shall be effective for a term of not more than two (2) years. Extension for a further period of the same duration may be declared only by a new reasoned decision of the National Executive Power.

Article 30

The title of ownership of a cultivar shall lapse for the following reasons:

Renunciation by the owner of his rights, in which case the cultivar shall fall into the public domain.

Where it is shown that the title has been obtained by means of fraud in respect of third parties, in which case the rights shall be transferred to their legitimate owner where he can be identified, falling which it shall fall into the public domain.

Expiry of the statutory term of ownership, from which time onwards it shall fall into the public domain.

Where the owner is not able to furnish a sample of the cultivar having the same characteristics of the original, at the request of the Ministry of Agriculture and Animal Husbandry.

Failure to pay the annual fee to the National Register of Cultivar Ownership within six (6) months of a duly substantiated demand for payment, in which case the cultivar shall fall into the public domain.

CHAPTER VI

FEES AND SUBSIDIES

Article 31

The National Executive Power, on a proposal by the Ministry of Agriculture and Animal Husbandry and with the advice of the National Seed Commission, shall lay down fees for the following cases:

Entry, annual renewal and certification in the National Register of Cultivar Ownership.

Entry and annual renewal and certification in the National Register of Seed Trade and Supervision.

Provision of official labels for “supervised” seed.

Seed analysis and cultivar tests.

Services requested.

Registration of laboratories and other ancillary services

Article 32

On a proposal by the Ministry of Agriculture and Animal Husbandry and with the advice of the National Seed Commission, the Executive Power may grant under credits and tax

exemptions to cooperatives, official agencies, persons and enterprises with domestic capital that deploy their efforts for phytogenetic creation. The funds to cover such expenditure shall be set off against the “Seed Law” special account.

Article 33

On a proposal by the Ministry of Agriculture and Animal Husbandry and with the advice of the National Seed Commission, the Executive Power may award prizes as an incentive to plant breeding technicians who, through their work in the various official agencies, contribute new cultivars possessing outstanding properties and being of significant benefit to the national economy. The funds required for this purpose shall be set off against the “Seed Law” special account.

Article 34

A special account, with the heading “Seed Law” shall be opened and shall be administered by the Ministry of Agriculture and Animal Husbandry, to which shall be credited the funds obtained from fees, fines, donations and other income and amounts to be determined in the general budget of the Nation, and to which shall be debited the expenditure and investments required to keep up the services, subsidies and prizes referred to in this Law. Any funds not spent during one financial year shall be carried forward to the following financial year.

CHAPTER VII

PENALTIES

Article 35

Any person who displays or furnishes for any purpose seed not identified in the manner laid down by Article 9 and the regulations or who makes a false statement in the specifications on the container label shall receive a reprimand in the case of a simple error or omission and, in other cases, be liable to a fine of between one hundred pesos (\$100) and one hundred thousand pesos (\$100,000) together with confiscation of the merchandise if it cannot be put into proper condition for marketing as seed. In such case, the Ministry of Agriculture and Animal Husbandry may authorize the owner to sell the confiscated merchandise for consumption or destruction as determined by the regulations.

Article 36

Any person who distributes seed of cultivars not registered in the National Register of Cultivars shall be liable to confiscation of the merchandise and a fine of between one thousand pesos (\$1,000) and sixty thousand pesos (\$60,000). The fine shall be adjusted by reference to the offender’s background and to the economic value of the seed.

Article 37

Any person who identifies or sells, with the correct or other identification, seed of cultivars whose propagation and marketing have not been authorized by the owner of the cultivar shall be liable to a fine of two thousand pesos (\$2,000) and one hundred thousand pesos (\$100,000).

Article 38

Any person who acts contrary to decisions taken under Article 15 shall be liable to a fine of between two thousand pesos (\$2,000) and one hundred thousand pesos (\$100,000) and confiscation of the infringing merchandise.

Article 39

Any person who provides information or who carries out advertising in a manner that is misleading or may mislead as to the quality or condition of seed, or who withholds or misrepresents information he is required to give by this Law, shall be liable to a reprimand or a fine of between one thousand pesos (\$1,000) and sixty thousand pesos (\$60,000).

Article 40

In addition to the penalties provided for in Article 33 to 39 and in Article 42, persons referred to in Article 13 may also be subject to provisional or final suspension from the National Register of Seed Trade and Supervision and thus be prohibited from exercising any activity governed by this Law during the period of suspension insofar as they may infringe this Law and its regulations in their capacity as importers, exporters, seed producers, processors, analysts, identifiers or sellers.

Article 41

Persons or entities required under Article 13 to register in the National Register of Seed Trade and Supervision who fail to do so shall be liable to a reprimand and shall be required to regularize the situation within fifteen (15) days of receipt of notification. In the event of non-compliance, they shall be liable to a fine of one thousand pesos (\$1,000). In the event of a second or third offense, the fine shall be a maximum of sixty thousand pesos (\$60,000).

Article 42

Failure to justify the use made of official labels acquired for “supervised” seed within the periods of time laid down by the regulations shall be punishable by a fine of twice the value determined for each label as laid down in Article 31(d).

Article 43

The seller shall be required to refund to the buyer the price of seed bought in infringement plus the cost of carriage. The buyer shall be required to return the seed he has not sown, together with the respective containers. Any expenditures resulting from this action shall be borne by the seller.

Article 44

The Ministry of Agriculture and Animal Husbandry may periodically publish the results of its inspections and samplings. It may also publish its decisions imposing penalties in two (2) newspapers, one (1) of which—at least—shall be a newspaper of the locality where the infringer resides.

Article 45

Officials acting under this Law may carry out an inspection, take samples, and effect analyses and tests of seed stored, transported, sold or offered or displayed for sale at any time or place. They shall have access to any premises where seed is held and may request or examine any documents relative to seed presumed to be in infringement for a period not exceeding thirty (30) days.

To this end, the Ministry of Agriculture and Animal Husbandry may in all cases where it deems fit, request the effective cooperation of other official agencies, as well as the assistance of the police.

Article 46

The penalties for infringement of this Law and its regulations shall be imposed by the Ministry of Agriculture and Animal Husbandry, following a decision by the National Seed Commission. The persons on whom penalties have been imposed may appeal for reconsideration to the Ministry within ten (10) working days following notification of the penalty.

Article 47

The infringer may appeal from an adverse decision of the Ministry of Agriculture and Animal Husbandry to the Federal Court after paying the fine concerned within thirty (30) days of notification of the adverse decision.

Article 48

Application of the penalties under this Chapter shall not preclude such penalties as may be applicable for infringement of other statutory provisions.

TRANSITIONAL PROVISIONS

Article 49

The holders of cultivars provisionally entered under Law No. 12.253 at the time of entry into force of this Law may request ownership of those cultivars as laid down in Chapter V.

Article 50

Articles 22 to 27—Chapter Promotion of Genetics—of Law No. 12.253 are hereby repealed together with any other provision contrary to this Law.

Article 51

Chapters I and II shall enter into force on the day that this Law is promulgated, the other Chapters and Articles 49 and 50 shall enter into force six (6) months after the promulgation of this Law. The Ministry of Agriculture and Animal Husbandry may postpone for up to eighteen (18) months the application of Article 9 for such seed as it deems fit.

Article 52

** Source: Boletín Oficial of April 16, 1973

ARGENTINA IMPLEMENTING DECREE NO. 2183/91 TO THE LAW ON SEED AND PHYTOGENETIC CREATIONS*

CHAPTER

I

GENERAL

Article I

For the understanding of the concepts used in Law No. 20.247 and in these Regulations,

“Seed” or “planting material” means any plant organ, not only seed in the strict botanical sense, but also fruit, bulb, tubers, buds, cuttings, cut flowers and any other structures, including nursery plants, whenever intended or used for sowing, for planting or for propagation.

“Plant genetic creation” means any variety or cultivar, whatever its genetic nature, obtained by discovery or by incorporation and/or application of scientific knowledge.

“Variety” means a group of plants within a single botanical taxon of the lowest known rank which can be defined by the characteristics that are the expression of a given genotype or combination of genotypes and can be distinguished from other groups of plants of the same botanical taxon by at least one of the said characteristics. A particular variety may be represented by several plants, a single plant or by one or several parts of a plant, provided that such part or parts can be used for the production of entire plants of the variety.

“breeder” means the person who breeds or discovers a variety or cultivar.

CHAPTER II

NATIONAL SEED COMMISSION (CONASE)

Article 2

The NATIONAL SEED COMMISSION (CONASE) shall exercise the function of adviser under Article 7 of the Law No. 20.247 under the jurisdiction of the SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES, which will exercise full powers as the implementing authority under the said Law.

Article 3

In the cases for which provision is made in indents d) and e) of Article 7 of Law No. 20.247, the NATIONAL SEED COMMISSION (CONASE) shall give its opinion within a period of FIFTEEN (15) days. It can request a single extension of time of fifteen days when the completion of the task requires it. At the expiration of the said period, the implementing authority shall act on the matter without further formalities.

Article 4

The Technical Secretariat of the NATIONAL SEED COMMISSION (CONASE) shall perform its functions within the ambit of the implementing authority under Law No. 20.247 jointly with the committee provided for in Article 8 of the said Law.

CHAPTER III

IMPLEMENTING AUTHORITY

Article 5

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES, as the implementing authority under Law No. 20.247, shall perform the tasks described in Article 6 of this Decree by means of the NATIONAL SEED SERVICE (SENASE), or any organization, which replaces it in the future.

Article 6

The following shall be the functions of the NATIONAL SEED SERVICE (SENASE):

to keep the National Register for Seed Trading and Certification and to publish periodically the lists of establishments that constitute its sections;

to keep the National Register of Cultivars, to effect the registration *ex officio* of plant genetic creations that are a matter of common knowledge and to publish specific catalogues periodically;

to keep the National Register of Cultivar Ownership and to issue cultivar property titles;

to effect botanical, agricultural and industrial inspections of varieties that have been or are to be registered, and also of material subject to certification in plant research establishments;

to lay down provisions for the registration, operation and supervision of establishments that produce “certified” seed, and also of any other category of establishments that it sees fit to regulate;

to lay down with the advice of the NATIONAL SEED COMMISSION (CONASE) provisions for the registration and supervision of the growing and production of the various categories of seeds;

to carry out inspections of establishments producing certified and/or identified seed;

to carry out the inspection of planted material submitted for certification, and to authorize the sale of the production achieved;

to arrange for the printing of official labels for the identification of certified seed;

to sell the official labels to certified establishments;

to carry out the inspection of seed on sites of production, processing, trading or transport;

to determine the characteristics and procedure for the packing and labeling or planting material;

(II) to supervise the publicizing of the agronomic characteristics of varieties;

to supervise the import and export of seed under Law No. 20.247

to direct the Official Board of Comparative Testing and Registered Cultivars, and to publish findings periodically;

(ñ) to direct the Central Seed Testing Station and its associated laboratories; to lay down the provisions for the authorization and operation of seed-analysis laboratories;

to supervise the seed trade, exercising the police powers established by Article 45 of Law No. 20.247;

to publish periodically the results of the inspections and samplings provided for in Article 44 of Law No. 20.247;

to ensure compliance with Article 39 of Law No. 20.247

to provide for control over the production and transport of seed prior to its identification;

to determine the fate of seed confiscated under Articles 35 to 38 of Law No. 20.247;

to provide the NATIONAL SEED COMMISSION (CONASE) with all information that may be requested of it for the satisfactory operation of the latter body;

to lay down provisions for the operation of quality certification schemes organized by species or groups of species;

to lay down provisions whereby the National register for Seed Trading and Certification registers for publicity purposes, and at the request of interested parties, standard license contracts and/or ordinary licenses granted by breeders or associations of breeders and third parties;

The NATIONAL SEED SERVICE (SENASA) may, in order to carry out the aforesaid functions better, seek the advice of the NATIONAL SEED COMMISSION (CONASE) on matters within its competence.

Article 7

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES may delegate the functions provided for in subparagraphs (g), (h), (j), (k), (l), (o), (p), (q), (r) and (s) or Article 6 of this Decree by means of special arrangements with official agencies at national, provincial or municipal level, which shall remain under the supervision and direct responsibility of the implementing authority, subject to a prior ruling by CONASE. It may likewise entrust collaborative functions to private bodies with respect to the assignments provided for in subparagraphs (g), (h), (j), (k) and (n) of the said Article 6, by means of special arrangements under the supervision and direct responsibility of the implementing authority, subject to a prior ruling by the NATIONAL SEED COMMISSION (CONASE).

CHAPTER IV

SEED

Article 8

For the purposes of the interpretation of Article 9 of Law No. 20.247, it shall be presumed that:

Seed “exposed to the public” means all that which is available for delivery for whatever reason and in respect of which advertising, the display of samples, trading, offering for sale, display for sale, transactions, exchanges or any other forms of marketing take place, whether on properties or in premises, warehouses, depots, fields, etc., either in bulk or in containers of any kind.

Seed “delivered to users for whatever reason” means all that seed which is:

- in vehicles destined for users;
- in the possession of users.

Seed that has not been identified or is in the process of being identified and does not fall into the above categories shall be regarded as not exposed to the public.

Supervision of the production and transport of seed prior to identification shall be organized by the SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES jointly with the organization, which is competent in the particular case.

The Law 19.982 on the Identification Merchandise as amended shall apply subsidiarily for the purposes of identification.

Article 9

“Label” means any label, tag, or printed slip of any kind pasted, stamped or tied on to the seed package or container. The implementing authority shall lay down rules concerning the use, characteristics and constituent materials of labels, packages and containers and any other elements suitable for identifying, containing or protecting planting material.

Article 10

The class of “identified” seed shall include the following categories:

“common”: where the name of variety is not given;

“listed”: where the name of variety is given. The implementing authority shall specify the cases in which the cultivar may or should be mentioned, for which purpose it may seek the advice of the NATIONAL SEED COMMISSION (CONASE).

Article 11

The class of “certified” seed contains the following categories:

“original” (basic or initial): the progeny of genetic, prebasic or elite seed, produced in such a way as it retains its purity and identity;

“certified first-propagation” (registered): the first-generation off-spring of “original” seed;

“certified subsequent-propagation”: seed produced from “original” or “first-propagation” planting material or from any earlier propagation stage; the implementing authority shall specify the stages of propagation;

“hybrid”: planting material obtained as a result of the production cycle for first-generation hybrid cultivars.

Article 12

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHEREIS, on the advice of the NATIONAL SEED COMMISSION (CONASE), shall determine the species in respect of which it shall be mandatory or optional to produce and sell seed corresponding to the “certified “ class.

Planting material corresponding to species where certification is optional may be marketed as “identified” except in the case of hybrid cultivars.

Article 13

The import and export of seed shall take place through the agency of the SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES, which may grant or refuse import or export licenses in the light of an assessment of their compliance with requirements pertaining to registration, quality, health and certification of origin that have to be met by any seed according to its species, cultivar and destination, the latter term being understood to mean direct distribution, propagation or testing.

The import of seed of species declared “agricultural pests” is prohibited.

Article 14

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES shall lay down, on the proposition of the NATIONAL SEED SERVICE (SENASE), the maximum and minimum periods determining liability for the quality of planting material.

The sale or display of the identifier or retailer shall end if, when the merchandise has been delivered, it is found that the containers have been tampered with or that the merchandise has been improperly stored by others.

The fact of pasting, stamping or attaching a label on to a package or container shall have the character of a sworn declaration on the part of the person who does so.

CHAPTER V

NATIONAL REGISTER OF CULTIVARS

Article 15

The national Register of Cultivars shall be organized in sections by species, botanical varieties or lower taxons where appropriate, according to the rules laid down by the NATIONAL SEED SERVICE.

Article 16

Those new or undisclosed cultivars that meet the requirements of Article 18 of this Decree shall be entered in the National Register of Cultivars, as shall, *ex officio*, those that are a matter of common knowledge on the date of entry into force or Law No. 20.247.

For those purposes:

“new or undisclosed variety means any variety that has been identified for the first time, is covered by a property title issued by the implementing authority or has not yet been recorded, with a similar description, at the time of its submission to the National Register of Cultivars;

“variety that is a matter of common knowledge” means any variety that has appeared in scientific publications or in official or private catalogues in the country, or has been declared to be in the public domain in countries with which reciprocity agreements exist, and the characteristics of which, as required by Article 17 of Law No. 20.247, are known.

Article 17

Varieties already registered under Decree No. 50/89 shall remain on record in the official registers kept by the implementing authority.

Article 18

The application form for entry in the National Register of Cultivars shall have the character of a sworn statement and shall be filed with the implementing authority subject to compliance with the following requirements:

name, address and registration number of the applicant in the National Register for Seed Trading and Certification;

name, address and professional registration number of the agronomist sponsoring the registrations;

common and scientific names of the species;

name of the variety;

establishment and locality in which the variety has been produced, with an indication where appropriate of the country of origin;

morphological, physiological, health, phenological and physico-chemical features, and the most striking industrial or technological properties that allow it to be distinguished. Photographs, drawings or any other commonly accepted technical means of illustrating morphological aspects should be enclosed.

Article 19

For the purposes of compliance with the provisions of subparagraph (d) of the foregoing Article, it shall be considered that:

varieties to be registered must be designated by a denomination intended to be its generic designation in accordance with the provisions of Article 17 of Law NO. 20.247; that denomination shall combine the following characteristics:

- (I) it shall permit identification of the variety;
- it may not be composed solely of numerals, except where that is a common practice in the designation of varieties;
- it may not mislead or confuse as to the characteristics, value of identity of the variety or as to the identity of its breeder;
- it must be different from any denomination that designated a pre-existing variety of the same botanical species or a similar species in any other country;

The NATIONAL SEED SERVICE (SENASE) may refuse the registration of a variety whose denomination does not combine the aforesaid characteristics, and shall demand the proposal of another denomination within 30 days of the notification of refusal;

the implementing authority may in addition require the breeder to change the denomination of a variety when:

it affects prior rights granted by another country;

registration is sought for a denomination different from the one registered for the same cultivar in a State or States with which the Argentine Republic has signed agreements on the subject.

Article 20

Any person who places on sale or in any way markets or handles in any capacity planting material of a variety protected by a property title shall be obliged to make use of the denomination of that variety, even after the property title has expired, provided that previously-acquired rights are not affected thereby. The denomination of the variety may likewise be accompanied by a trademark or trade name or similar sign, in so far as it does not mislead as to the denomination of the variety or the name of the breeder.

Article 21

If a cultivar is registered in the National Register of Cultivar Ownership, the approved denomination thereof shall be registered at the same time as the property title concerned is granted.

Article 22

The implementing authority may request the submission of additional information on agronomic properties: genetic origin, proof of health status, agro-ecological qualities and proof of industrial value.

Article 23

The NATIONAL SEED SERVICE (SENASE) shall regulate the registration of varieties in the National Register of Cultivars, which shall be given priority according to the hour and date of submission, and which may be registered either provisionally or finally, while registration may also be refused, and the exercise of the rights deriving from grant suspended, or rights already registered may be cancelled, where anomalies or defects that warrant such a step are detected. The measure shall be subject to appeal by referral to the Federal Courts of Administrative Litigation.

Article 24

The National Seed Service (SENASE) shall satisfy itself of the authority or scientific value of catalogues or publication invoked in cases of synonymy, and shall set the date from which the simultaneous use of different names for the same variety is to be prohibited.

Article 25

Where varieties belonging to a species whose registration has been organized and implemented have not themselves been registered or where their registration has been

cancelled in the National Register of Cultivars, their distribution on whatever grounds shall be prohibited.

CHAPTER VI

CONDITIONS FOR THE GRANT OF TITLE OF OWNERSHIP

Article 26

For a variety to be the subject of a property title it shall meet the following conditions:

Novelty: It shall not have been offered for sale or sold by the breeder or with his consent: in the national territory, before the date of filing the application for inscription in the National Register of Cultivar Ownership; in the national territory of another State with which the Argentine Republic has bilateral or multilateral agreement on the subject for a period greater than FOUR (4) years, or in the case of trees or vines, for a period greater than SIX (6) years before the application for inscription in the National Register of Cultivar Ownership;

Distinctness: It must be clearly distinguishable by means of one or more characteristics, from any other variety whose existence is a matter of common knowledge at the time of the filing of the application. In particular, the filing of an application for the granting of a breeder's right or for the entering of another variety in an official register of varieties, in any country, shall be deemed to render that other variety a matter of common knowledge from the date of the application, provided that the application leads to the granting of a breeder's right or to the entering of the said other variety in the official register of varieties, as the case may be.

Uniformity: Subject to predictable variations due to the specific features of its propagation, it must retain its most significant hereditary characteristics in a sufficiently uniform manner;

Stability: its most significant hereditary characteristics must remain true to the description thereof after repeated propagation, or, in the case of a particular cycle of propagation, at the end of each such cycle.

Article 27

The grant of a property title in a variety, in so far as it meets the conditions specified in this Title and the denomination of the variety conforms to the provision of Articles 19, 20 and 21 of this Decree, may not be made subject to any additional condition other than payment of the appropriate fee.

CHAPTER VII

RECORDING IN THE NATIONAL REGISTER OF CULTIVAR OWNERSHIP

Article 28

The national Register of Cultivar Ownership shall be organized in sections by species, botanical varieties or lower taxons where appropriate, as directed by the implementing authority.

Article 29

The application for registration in the National Register of Cultivar Ownership shall have the character of a sworn statement, and shall be filed with the implementing authority, subject to compliance with the following requirements:

name, address of the breeder or discoverer or his national representative if appropriate;

name, address and professional registration number of the agronomist sponsoring the registration;

common and scientific names of the species;

name proposed for the variety;

establishment and locality in which the variety was bred;

description: this must cover the morphological, physiological, health, phenological and physico-chemical features, and also the industrial or technological properties that allow it to be identified; drawings, photographs or any other commonly-accepted technical means of illustrating morphological aspects shall be enclosed;

justification of novelty: reasons for which it is considered that the variety possesses new and undisclosed character, with evidence of differentiation in relation to existing varieties;

verification of stability: date on which the cultivar was propagated for the first time as such, for verification of stability;

origin: national or foreign, with an indication in the latter case of the country of origin;

reproductive or vegetative propagation mechanism;

other additional conditions for species that so require, as established by the NATIONAL SEED SERVICE (SENASA).

The implementing authority may, when it considers this necessary, require field trials and/or laboratory tests for the verification of the characteristics attributed to the new cultivar.

Article 30

The filing of the application for the registration of a variety in any State with which the Argentine Republic has a bilateral or multilateral agreement on the subject shall give the applicant priority for TWELVE (12) months for its registration in the National Register of Cultivar Ownership: that period shall be calculated as from the day following that of first

filing in any such State. On its expiration, the applicant shall have a period of TWO (2) years in which to submit the documentation and material required by Article 29 of this Decree.

Article 31

Any decision to grant a right of ownership of a variety shall require an examination for compliance with the conditions provided for in Chapter VI of this Decree. In the course of the examination, the NATIONAL SEED SERVICE (SENASE) may grow the variety or carry out other necessary tests or take into account the results of growing tests or other trials, which have already been carried out. For the purposes of examination, the authority may require the breeder to furnish all the necessary information, documents or material, which should be available to the implementing authority for the validation of the title of ownership.

Article 32

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES, on the advice of the NATIONAL SEED COMMISSION (CONASE), shall enact provisions governing the procedure for the recording of cultivars in the Register. The provisions to be enacted shall be without prejudice to the right of third parties to make such oppositions as they consider appropriate.

Article 33

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES, when it has all the facts of the case in its possession, shall decide on the grant of the property title and shall make appropriate communication to the applicant and shall issue the title.

Article 34

If the decision of the SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES is to refuse registration, this shall be brought to the notice of the applicant in order that he may produce specific proof concerning the aspects objected to within a maximum period of HUNDRED AND EIGHTY (180) days.

If the applicant does not contest the refusal of his application, he shall be regarded as having renounced it.

If he does not contest the refusal, the SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES shall have THIRTY (30) days within which to pronounce on the subject, for which purpose it may seek the advice of the NATIONAL SEED COMMISSION (CONASE).

Article 35

The breeder's right shall be declared null and void when it is established that, at the time of the grant of the title of ownership:

The conditions laid down in indents (a) and (b) of Article 26 were not effectively complied with.

(b) Where the grant of the breeder's right has been essentially based upon information and documents furnished by the breeder, the conditions laid down in indents (c) and (d) of Article 26 were not complied with.

The right of the breeder shall not be declared null and void for reasons other than those referred to in this article.

Article 36

The right of the breeder in a variety shall lapse in accordance with the provisions of Article 30 of Law 20.247 for the following reasons:

The breeder surrenders his rights, in which case the variety falls into the public domain;

When it is shown that it has been obtained by fraud upon a third party, in which case the right shall be transferred to its legitimate owner if he can be identified. In the contrary case, it shall fall into the public domain;

Upon termination of the legal period of ownership, after which it passes into the public domain;

When the breeder is not in a position to provide the implementing authority with the materials considered necessary to control the maintenance of the variety, as required by Article 31 of this Decree;

For failure to pay the annual fee to the National Register of Cultivar Ownership for a period of SIX (6) months from the making of a demand for payment, after which the variety passes into the public domain.

The breeder may not be deprived of his right for reasons other than those mentioned in this Article.

Article 37

Property titles for cultivars shall be granted for a maximum of TWENTY (20) consecutive years for all species.

The SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES may specify other shorter periods depending on the nature of the species.

Article 38

When the property title has been granted, the relevant decision of the SECRETARIAT OF AGRICULTURE, LIVESTOCK AND FISHERIES shall also be published at his expense.

Article 39

Any transfer of the property title shall take place in the form of a request that states the names and addresses of the transferor and transferee, and shall be accompanied by the legal document evidencing the said transfer. The record of transfer shall be entered in the National Register of Cultivar Ownership and on the property title. The transferee shall remain subject to the same obligations as the transferor.

Article 40

Where the breeding of a new variety has been achieved by two or more persons, ownership thereof shall be governed by the rules of the Civil Code on joint ownership.

In the case of persons who have collaborated in the breeding of the variety in the course of employment relations, the provisions of Article 82 of the Law on Employment Contracts, No. 20.744, and amendments thereto, shall apply.

CHAPTER VIII

THE RIGHTS OF THE BREEDER, SCOPE AND RESTRICTIONS

Article 41

For the purposes of Article 27 and related Articles of Law No. 20.247, and also the present Regulations, the property rights granted to a breeder in respect of a variety shall have the effect of making his prior authorization necessary for the acts specified below in relation to the planting material of the protected variety:

- Production or reproduction;
- Conditioning for the purposes of propagation;
- Offering for sale;
- Sale or any other form of marketing;
- Export;
- Import;
- Advertising, display of samples;
- Exchange, transfer and any other form of commercial transaction;
- Stocking for any of the purposes mentioned in subparagraphs (a) to (h);
- Any other delivery, in whatever connection.

Article 42

The breeder may make his authorization of the acts specified in the foregoing Article subject to conditions defined by himself, including for instance quality control, inspection of plots, volume of production, royalty percentages, periods, authorization to sublicense and other such restrictions.

Where a breeder makes a firm public offer of licensing, it shall be presumed that whoever carries out any of the acts specified in the foregoing Article has secured authorization therefor.

Article 43

The ownership of a variety shall not prevent its use as a source of variation or as a provider of desirable characteristics in plant improvement work.

To that end, it shall not be necessary either to know the breeder or to secure his authorization. However, the repeated and/or systematic use of a variety as necessary means of producing commercial seed shall require the authorization of the said owner.

Article 44

The authorization of the breeder of a variety shall not be required, in accordance with the provision of Article 27 of Law No. 20.247, when a farmer saves and uses as planting material on his own holding or estate, the product of the harvest which he has obtained by planting on the said holding or estate a protected variety.

Article 45

Final decisions handed down by the administration bodies created by Law No. 20.247 and by this Decree shall be subject to appeal before the Federal Courts of Administrative Litigation together with consequential decisions involving ownership of varieties, which in the field or private law can result from the breach of other legal rules.

Article 46

The “restricted public use” declaration shall be published in the Official Gazette and in one specialized publication, which latter shall request submissions from interested third parties, together with the minimum technical and economic guarantees and any other requirements that have to be met by such applicants

Article 47

Any exploitation under “restricted public use” provisions shall be registered by the implementing authority.

Interested third parties shall be registered by the same authority, with an indication of name and address, and of the locality and area of the exploitation to be undertaken and information on compliance with the technical economic guarantees imposed.

Article 48

The implementing authority shall undertake the verification of the existence of original seed of the “restricted public use” variety in the exploitation thereof by licensed third parties. Any surplus planting material shall be returned to the owner of the variety on expiry of the period for which “restricted public use” has been declared.

Article 49

The names of varieties that become public property shall have the same character, even where they have also been registered as trademarks.

Article 50

The fees and fines provided for in Chapters VI and VII of Law No. 20.247 as amended shall be paid to the implementing authority.

CHAPTER IX

TRANSITIONAL PROVISIONS

Article 51

This Decree shall enter into force on the day following its publication in the Official Gazette.

Article 52

Decree No. 50 of January 17, 1989, shall be repealed on the coming into force of this Decree.

Article 53

This Decree is to be communicated, published, conveyed to the National Directories of Official Registration and placed on record.
